

Solution Engineer / Technical Consultant with experience supporting AI-driven platforms, including prompt engineering for LLM-based systems, backend integrations, and healthcare applications. Skilled in translating customer requirements into scalable technical solutions, designing and optimizing prompts, automating workflows using Python, and collaborating with product and engineering teams to deliver reliable, compliant, and high-impact solutions.

## EXPERIENCE

### Support & Implementation Analyst

Aug 2025 - Nov 2025

*Meditab Software (India) Pvt. Ltd.*

*Ahmedabad, GJ*

- Partnered with healthcare customers and internal teams to understand clinical and billing workflows, configure system settings, and deliver compliant solutions for patient data, claims, and revenue-cycle processes.
- Collaborate closely with physicians, coders, and billing teams to resolve coding-related system issues and optimize documentation accuracy
- Collaborate with cross-functional teams (QA, Development, Product, and Operations) to resolve defects and enhancements.
- Ensure strict compliance with healthcare regulations, documentation standards, and data privacy requirements including HIPAA and CMS guidelines.
- Support end-to-end ICD-10 diagnosis coding and CPT/HCPCS procedure coding workflows, ensuring accurate capture of clinical and billing data.

### Associate Software Engineer

Jul 2023 - Jul 2025

*DARAHAAS GLOBAL SERVICES PRIVATE LIMITED*

*Bangalore, KN*

- Supported AI-driven solution development and intelligent agent workflows, contributing to automation use cases, data-driven insights, and customer-facing system enhancements.
- Developed and integrated AI agents for task automation and intelligent workflow support, including data querying, response generation, and process optimization, improving operational efficiency and reducing manual effort.
- Troubleshoot application issues, data discrepancies, and batch failures by analyzing logs and SQL queries, identifying root causes, and collaborating with development teams to implement permanent fixes.
- Generated operational reports and dashboards using MS Excel and system data for management review and audit readiness.

## PROJECTS

### Social Media Sentiment Analysis (Graduate Project)

Jan 2023 - May 2023

*Madav Institute of Technology and Science*

*Gwalior, M.P.*

- Developed a Python script to efficiently extract and process tweets and YouTube comments data for analysis, enabling sentiment tracking and trend identification.
- Performed Natural Language Processing (NLP) techniques including tokenization, lemmatization, and vectorization to clean and convert unstructured text data into a machine-readable format, enabling accurate analysis and model training.
- Designed, implemented, and fine-tuned a Naive Bayes classification model to analyze processed text data and accurately determine the sentiment polarity (positive, negative, neutral) of the dataset for sentiment analysis tasks.

## EDUCATION

### B.Tech. in Information Technology

Jul 2020 - Jun 2023

*Madav Institute of Technology and Science, Gwalior*

(CGPA - 7.95/10.0)

### Diploma in Information Technology

Jul 2017 - Jun 2020

*Dr. Bhim Rao Ambedkar Polytechnic College, Gwalior*

(CGPA - 7.45/10.0)

## SKILLS

**Programming & Databases:** Python, Oracle SQL, MySQL, PostgreSQL

**AI Automation & Agent Skills:** Intelligent agent workflows, LLM Fundamentals, Monitoring and Optimization of AI Workflows, Basic RAG Concepts, Custom GPTs.

**ETL & Data Integration:** ETL Workflow Execution and Optimization, Data Pipeline Troubleshooting, Power BI

**Data & Analytics:** Data Analysis, Data Cleaning, Pandas, NumPy, Netvibes(Basic) , Data Visualization (Amazon QuickSight), Student Data Processing, Learning Analytics

**Prompt Engineering & AI Interaction:** Prompt Design and Optimization, Structured Prompting (Role-Task-Context-Output), Zero-shot, One-shot and Few-shot Prompting, Prompt Debugging, Response Refinement

**Security & Compliance:** HIPAA Compliance, Data Privacy, Access Control, Audit Readiness, Secure handling of sensitive healthcare data

## CERTIFICATES

- Big Data Computing Issued By IIT Kanpur
- Data Analytics with Python Issued By IIT Roorkee
